

Cost-effective, on-site IP PBX

Full-feature, on-site IP PBX that allows you to break away from expensive proprietary solutions

Far South PBX

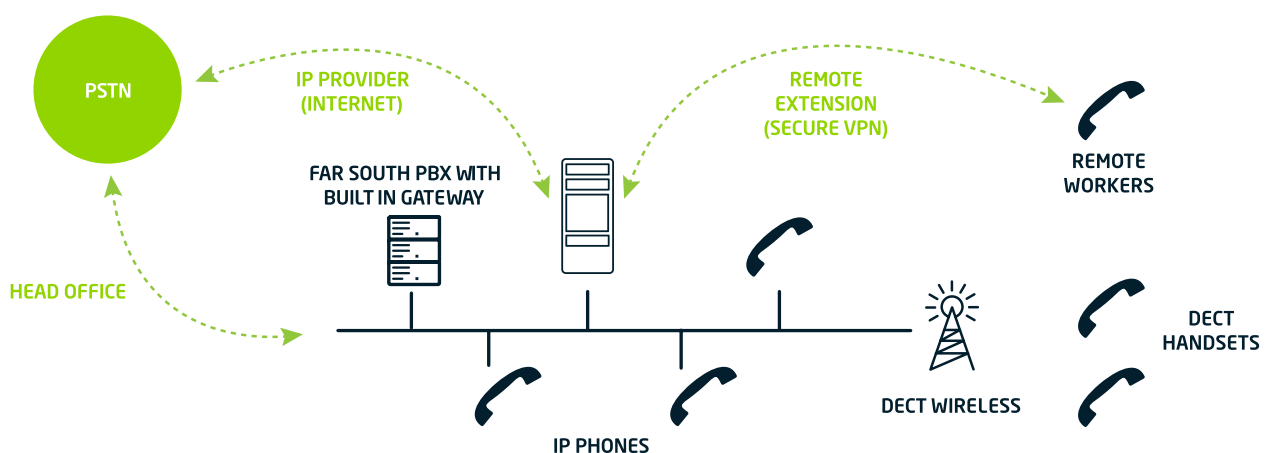

- Save on costs by making the move to IP telephony
- Complete phone system that provides call switching, routing and call queuing
- Scalability (add extensions and lines as and when your needs grow)
- No proprietary hardware modules needed to increase users (unlimited IP users)
- Feature-rich functionality comes standard (call recording, voicemail to email)
- Robust and reliable technology

Product overview

Far South PBX, from Vox, is a locally developed IP PBX that can be deployed in any SOHO, SME or enterprise environment. Based on open-standards, Far South PBX empowers you to break away from the high prices associated with traditional, proprietary PBX systems, and adopt a robust, fully scalable model that suits your business model and financial management style. Equipped with

both IP and analogue functionality, Far South PBX allows your business to transition into a fully-fledged IP environment at a low cost. With over a decade of experience in delivering corporate telecommunications, Vox is well positioned to provide you with a comprehensive PBX platform that encompasses a number of end-to-end telephony solutions.
