

# Bulk SMS Gateways

A high-volume centralised SMS gateway with direct links to networks

# SMS Gateway

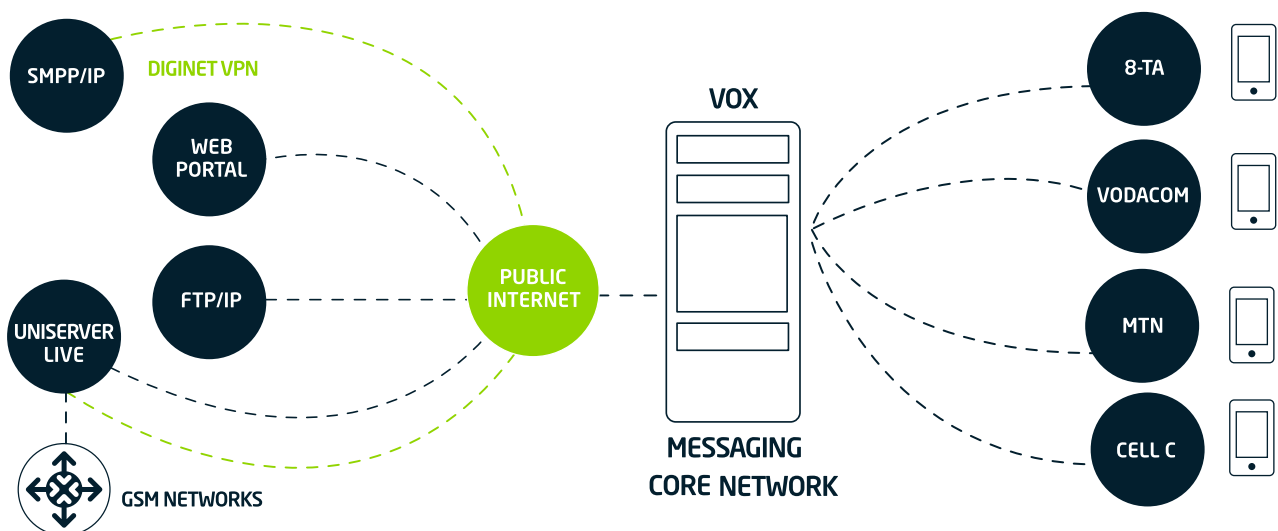

- Send and receive thousands of SMSes per hour
- 24/7 access to campaigns using SMS web portal
- Real-time status reports on message delivery
- Personalise outbound messages
- Analyse and monitor campaigns
- Set up autoreplies to messages received

## Product overview

The Vox SMS Gateway enables you to connect any SMS application to the mobile networks using a variety of

integration methods (such as web services, FTP, SMPP, etc.), enabling you to send up to 48 000 SMSs per hour, or as needed.

## How it works

## Features and benefits

- **SMPP, API, Web Services connection options**

Various integration methods to connect directly to binds across all networks depending on your system requirements.

- **High sending volumes**

With the ability to send up to up to 48 000 messages per hour, constraints of slow service sending will be a thing of the past.

- **Message delivery status reports**

Run historic reports, analyse and monitor your messaging campaigns.

- **24/7/365 support**

Vox offers 24/7/365 call logging support with 8x5 resolution to help you when you need it.
