

Open spectrum last-mile wireless access

The perfect backup or substitute for fixed-line last-mile technology

- Symmetric last-mile wireless
- Voice, video and data traffic
- Subject to line of sight survey
- Coverage in Johannesburg, Pretoria, Cape Town and Port Elizabeth

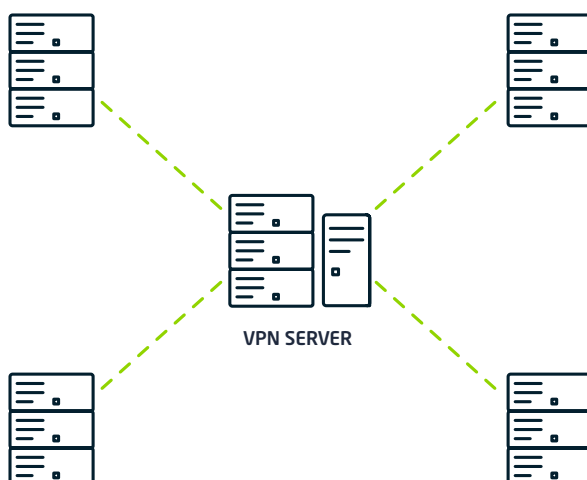

Product overview

Amobia, from Vox, is a wireless service provided through Amobia Communications, an independent network infrastructure player. Amobia's focus is on corporate branch connectivity solutions and high speed point-to-point open spectrum links. Amobia is an ideal solution for your sites

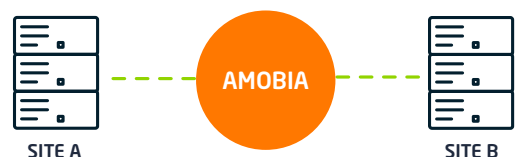

where last mile access options have been exhausted. Running in the 5.8GHz ISM band, Amobia is a symmetric 1:1 layer 2 offering, with a 99.7% availability paid-for Bronze SLA. Should budget be an issue, you also have the option of selecting the 4:1 contended solution.

How it works

STAR TOPOLOGY

POINT-TO-POINT TOPOLOGY

Features and benefits

- Quick deployment
- Scalability and flexibility with quick upgrade path
- SLA delivery
- Great redundancy option
- Faster installation times than traditional serial-based technology
- Provides similar security, performance and reliability of wired networks
- Managed and controlled contention ratios provide dedicated end to end capacity with no capacity sharing between clients on the 1:1 product offering

Product requirements

- A physical site survey
- Clear line of sight to an available high site, on Vox's network
- Router with an ethernet interface (provided by Vox)
- Written landlord's consent to mount equipment
- 2U of rack space

Symmetric last
mile wireless
