

High-speed, wireless last mile access

Vox Wireless Dedicated

A quickly deployable corporate wireless service that operates on a licensed, regulated spectrum.

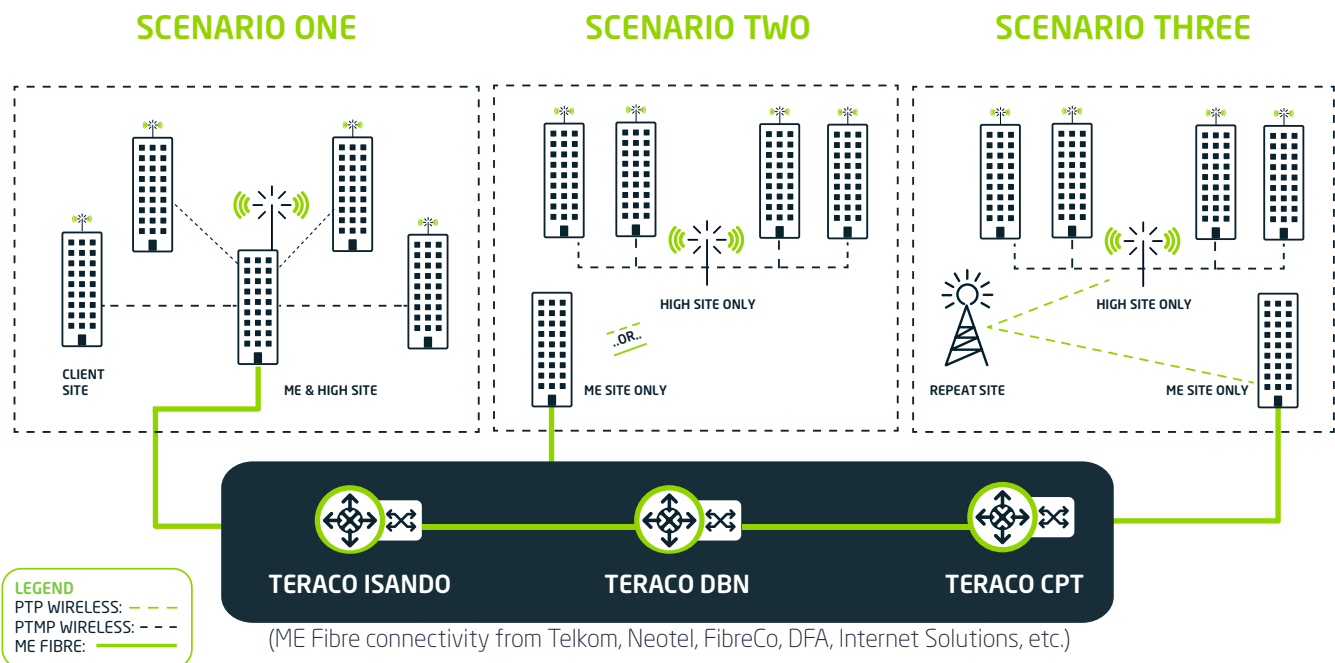

- Dedicated, symmetric wireless last mile
- Connect any regional branch to Vox's MPLS network
- Licensed, legal spectrum (28GHz)
- Offers security, performance and reliability of wired networks
- Scalability and flexibility with easy upgrade path
- 99.5% access link uptime

Product overview

Vox's corporate wireless service provides an ideal complementary or alternative service to traditional, fixed-line, last mile access services. A great standby solution when quality bandwidth is not available. Vox Wireless is a fixed-wireless, point-to-point data solution boasting high throughput

and quality service through the use of licensed microwave technology, utilising the 28GHz ICASA-allocated spectrums. This proven technology, combined with Vox's discounted voice and internet access services, creates an instantly deployable and cost-effective product that is perfect for your business.

How it works

Features and benefits

- **Metro ethernet architecture**
Vox Wireless is easier to manage and upgrade.
- **Wireless**
No fixed lines required. Vox Wireless provides similar security, performance and reliability of wired networks. It is also faster to install than traditional serial-based technology, enabling upgrades to be implemented on the day of order.
- **Licensed wireless spectrum**
Includes standard SLA.
- **Managed, end-to-end network management**
Ensuring carrier-grade performance.
- **Low latency**
A low latency network means that Vox Wireless is voice capable.
- **Dedicated service**
No contention. Last mile speeds are guaranteed and managed with controlled contention ratios providing dedicated end-to-end capacity.
- **Fixed pricing irrespective of distance, within Zone 1 areas**
Simple pricing model.
- **IP-based service**
Multimedia service on a single medium.
- **SLA committing to 99.5% uptime**
High performance. Gold Service Level Agreements (SLAs) provide commitments on Mean Time to Repair (MTTR) and uptime. Vox Wireless guarantees an uptime of 99.5% during a calendar month for links within the metro, with quick on-site response time and two hours repair time.

Product requirements

- A physical site survey
- Clear line of sight to an available high site on Vox's network
- Written landlord consent to mount equipment
- Router with an Ethernet interface (provided by Vox)
- 2U of rack space
