

# Flexible co-located hosting

Pay-for-what-you-need hosting solutions that plug directly into a high-speed backbone

# co-located hosting

- Connectivity directly into Vox Telecom's core network
- Secure data centres
- Flexible solutions that grow with your business
- 24/7/365 environment monitoring and support
- Redundant power and cooling
- Early warning fire detection and fire suppression
- Network diversity and performance
- Security-rich features

## Product overview

Every second that your business's network is down means lost opportunities, revenue and the confidence of your users and customers. Vox Telecom's flexible, co-located hosting solutions offer you the ability to ensure that your mission critical servers are available around-the-clock. Single server, half- and full-rack, and complete secure rack facilities are available, and with state-of-the-art data centres in

Johannesburg, Cape Town and Durban, Vox Telecom's co-located hosting solutions enable your business to connect to our high-speed fibre network from any of the major metros. With a standalone support centre, fast response times, a high-speed backbone to plug into, shouldn't you be hosting your critical applications from within Vox Telecom's world class data centres?
