

Open spectrum last mile wireless access

Rapidnet

An ideal complementary or substitute solution to fixed-line, last mile technology

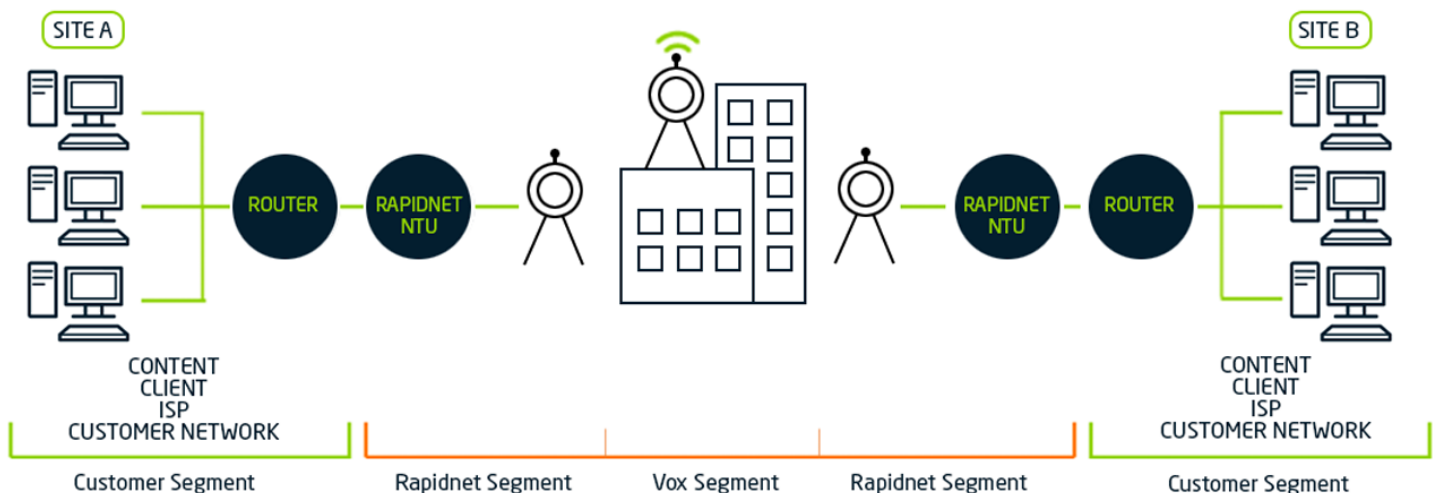

- Dedicated, symmetric last mile wireless access
- Coverage in Johannesburg and parts of KZN
- Handles voice, video and data traffic easily
- Ideal for either primary or redundant connectivity
- 99.5% availability SLA
- Round-the-clock monitoring

Product overview

RapidNet, from Vox, is an open spectrum wireless access service that designed for customer sites where last mile access options have been exhausted. Running in the 5.8GHz ISM band,

RapidNet is a symmetric 1:1 Layer 2 offering with a 99.5% availability SLA. All last mile access links are monitored round-the-clock, and bandwidth options vary available from 1Mbps upwards.

Structure

Features and benefits

- Faster installation times than traditional, serial-based technology
- Same-day upgrades
- Provides similar security, performance and reliability to wired networks
- Managed and controlled contention ratios provide dedicated end-to-end capacity, with no capacity sharing between customers
- SLA – guaranteed uptime of 99.5% during a calendar month for links within the metro with two hour on-site response and a further two hours to repair

Product requirements

- A physical site survey
- A clear line of sight to an available high site, on our network
- Written landlord's consent to mount equipment
- A router with an Ethernet interface (provided by Vox)
- 2U of rack space

Round-the-clock
monitoring

Handles voice,
video and data
traffic easily
