

Scalable, cutting-edge virtual servers

Fully-managed, enterprise-grade virtual hosting

Virtual Hosting

- Fully customisable offering that allows you to easily add capacity as your requirements change
- Flexible SLAs to meet disaster recovery and business continuity requirements
- Online self-management
- Managed service offering
- Built on best-of-breed technology
- Reduce the expense of owning and managing infrastructure

Product overview

Vox brings you a fully customisable virtual hosting solution. The solution offers stable, secure, high availability Virtual Machines (VMs) that are easily and immediately configurable and allow granular customisation of your VMs at any point. Gain instant access to scalable memory, processing and storage, and an environment that is based on your ever-evolving business needs.

Enable your cloud strategy

Whether your business is built on a private cloud, or you are a cloud provider looking for a technology partner, Vox's environment empowers you to build:

Built on best-of-breed technology

Infrastructure as a Service (IaaS)

Virtual servers, storage and network environment.

Platform as a Service (PaaS)

IaaS that includes comprehensive management of the operating system

Software as a Service (SaaS)

IaaS and PaaS that includes any custom or Vox application.

Robust infrastructure

Vox's infrastructure platform offers your business full data redundancy and disaster recovery, which includes the access, compute, storage, switching and network layers. Vox's storage environment also includes a second and full layer of duplication, which is housed in a vendor-neutral data centre more than 20km from existing Vox data centres. The storage network has a full active-active design, meaning that data centres are active at the same time and have full fail over between each other.

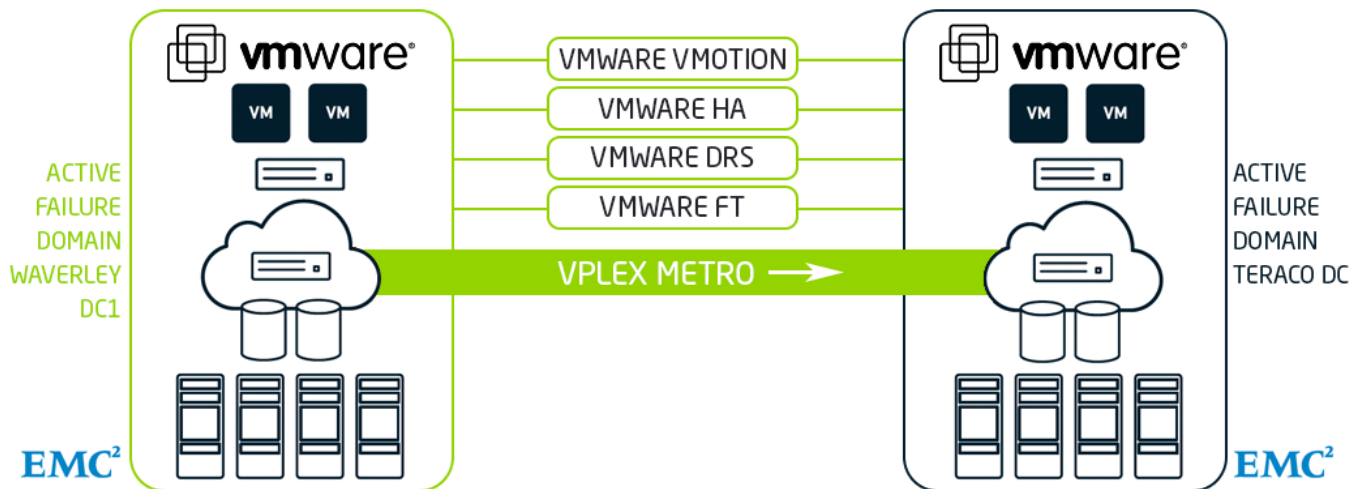

Managed services

Vox's Managed Virtual Hosting Service allows your business to completely outsource the management of your virtual servers to Vox. Ideal for organisations that lack the skills or resources to manage their own hosted virtual servers running Microsoft operating systems, Vox's Managed Service offering ensures that you are able to realise the full value and benefits of a world-class virtual environment.
