

Deliver any application to virtually any device

Cut out infrastructure and licencing costs by migrating to the cloud

- Put your business applications effortlessly into the cloud
- Access any of your business software or applications from any branch or virtually any device (including tablets and smartphones)
- Drastically reduce infrastructure, hardware, bandwidth, licencing and support costs
- Centrally manage your applications
- Increase user experience at low bandwidth sites
- Maximise the value of existing applications

Product overview

Cloudware from Vox Telecom creates true mobility of any application, and enables the delivery of legacy applications to virtually any device seamlessly and instantly. Users can instantly access any of your software or business applications from any device with a screen and an internet connection.

Due to the fact that only pixels are delivered to the device, the amount of data utilisation to interact with your business critical applications is a fraction of its current requirement, and security is enhanced by the fact that application data no longer resides on the machine used to access the application.

Vox Telecom Limited is a leading telecoms operator, providing voice, data and collaboration services to the southern African market.

Features

- No costly development to “mobile-enable” your applications/software
- Deliver to virtually any device or smartphone (iPad, iPhone, Galaxy, Windows, etc.)
- Reduction in infrastructure, hardware, bandwidth, licencing and support costs due to true cloud migration
- Accessible from anywhere in the world
- Manage all of your applications centrally (no more version control issues)
- Virtualisation of any of your legacy applications
- Instantly deliver and interact with network-intensive/ bandwidth-heavy applications (e.g. SAP)
- Secure Solution to BYOD revolution
- Independent of delivery protocols (RDP/TS)
- Cutting-edge technology that offers distinct advantages over Citrix for application delivery purposes and VDI for Virtual Desktop purposes

Testimonials

SuperGroup

Adrian Lewis, Chief Information Officer

“SuperGroup will continue to roll-out this technology as the cost benefits are providing real savings.”

Sebata

Gerrit Deyzel, IT Manager

“We cut our IT support costs at desktop level by 70% after just a few weeks!”
