

WiFi for the small home

Cost effective yet powerful WiFi for your home.

Vox Standard Home WiFi

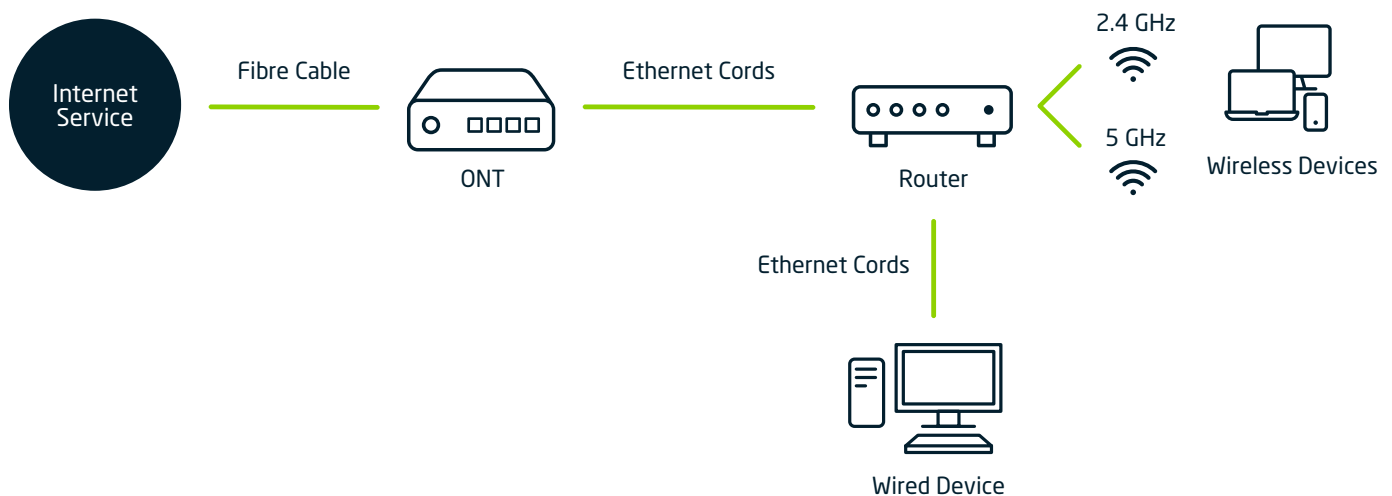

- High-speed, dual-band Wireless 802.11a/n/ac and five 10/100/1000 Ethernet ports
- Expand your coverage with additional units
- USB 2.0 slot for external storage or 4G/LTE modem
- Professionally installed
- Desktop or wall mountable

Product Overview

The Vox WiFi Home Standard offering provides ultra-reliable, predictable bandwidth and unprecedented high-speed performance for real-time video distribution and data transmission in the home. Our Standard offering is based the MikroTik hAP ac² WiFi enabled router, up to 30 metres of Cat5e

network cabling, installation and setup. This unit offers additional network ports to connect wired devices and USB port to connect a 4G/LTE modem. We can expand the coverage by installing additional MikroTik devices in other parts of your home, all connected to your main device by Cat5e network cable.

How It Works

Features and Benefits

Features	Benefits
Dual chain wireless (2.4GHz/5GHz) 802.11ac	With dual chain wireless (2x2) or MIMO you can connect more devices via WiFi and still enjoy fast WiFi speeds
Five 10/100/1000 Ethernet ports	With 5 high speed network ports available you connect non WiFi devices easily or even extra WiFi access points to increase coverage in your home
Powerful WiFi radios	We estimated a coverage area of 150 square metres per device but this could be more or less depending on what your homes walls are made of
Professional design and installation	Experienced engineers will install and setup everything you need in the best possible position to ensure great signal and performance. Additional devices can be purchased from your installer to increase coverage across your whole home

Additional Information

*Actual wireless data throughput, wireless coverage, and number of connected devices are not guaranteed and will vary as a result of:

- 1) Environmental factors, including building materials, physical objects, and obstacles
- 2) Network conditions, including local interference, volume and density of traffic, product location, network complexity, and network overhead
- 3) Client limitations, including rated performance, location, connection quality and client condition.

**Range, coverage, and the maximum number of connected devices are based on test results under normal usage conditions.

Home WiFi for
any budget and
need
