- Save up to 20% on your telephone bill
- Fully scalable from just a few users, to tens of thousands of users
- Fully managed and easy implementation
- Keep your existing number when switching to TeamsVOICE
- TeamsVOICE facilitates making calls from anywhere in the world using any smart device

Product overview

Many businesses are now implementing hybrid work environments that can accommodate onsite and remote working employees. Now more than ever, businesses need a modern voice solution and phone system with capabilities that combines unified communication and collaboration platform. Introducing TeamsVOICE, from Braintree by Vox, a Microsoft Gold Partner has developed an add-on, TeamsVOICE that will allow calling functionality direct from the Teams application. TeamsVOICE enables users to make,

receive, transfer, forward and put a call on hold from any location on a computer or smart device. Calls can be made to landline or mobile number of internal and external contacts, giving you the basic functionality of a traditional business phone system (PBX). TeamsVOICE uses the Braintree by Vox VOIP controller and connects Microsoft Teams to the world using two key elements: A Session Border Controller and SIP Trunk.

How it works

Features & Benefits

- **Port your numbers**

Keep your existing number when switching to TeamsVOICE and add new ones when needed.

- **Accessible**

Make calls from any enabled device to anyone, anywhere from a mobile and landline.

- **Significant savings**

Telephony costs are reduced by accessing Vox VoIP calling charges and operating a unified communications solution. Save up to 20% on your telephone bill.

- **Easy Installation**

Fully managed implementation with uncomplicated configuration and deployment.

- **Phased Migration**

"Running down the clock of existing PBX assets" - No need for the business owner to buy new hardware to use TeamsVOICE.

- **Improved Productivity**

Increased efficiency due to a unified platform for internal and external communications.

**Make, receive and transfer
calls in the office,
at home, or on the road
using your PC or mobile
smart device.**
