

Professionals need professionally managed WiFi

Managed WiFi ensuring you have the best in-home wireless Internet experience possible.

Vox Executive Home WiFi

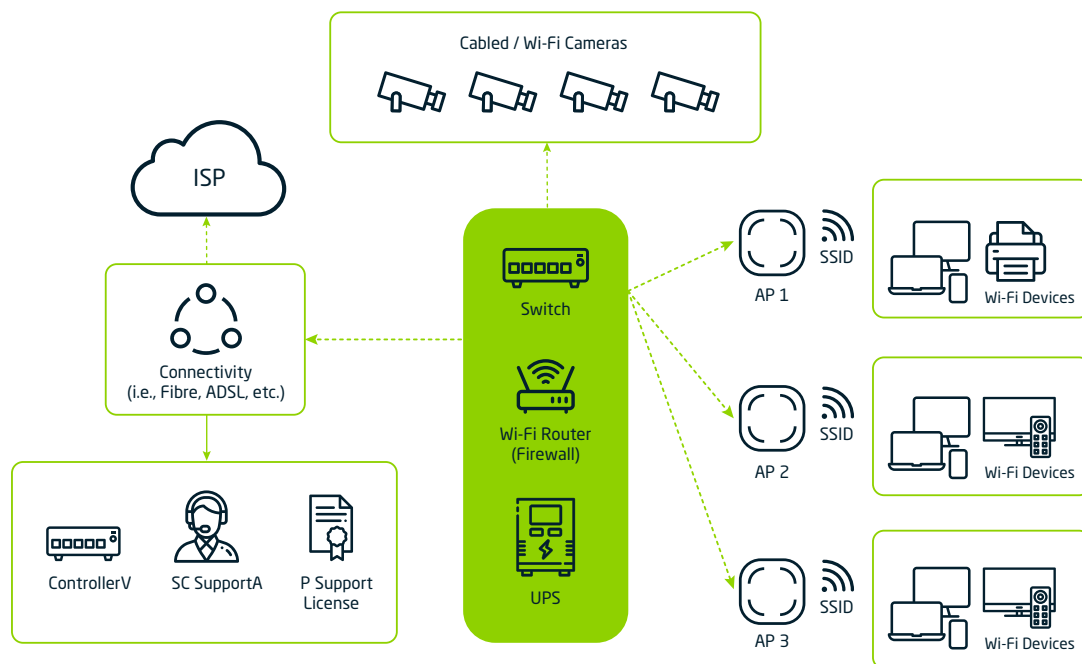

- Work From Home ready
- Scalable wired and wireless access
- Expert WiFi design
- Centralised Control
- Premium equipment
- Professionally installed

Product Overview

The Vox Executive Home WiFi offering provides ultra-reliable, predictable bandwidth and unprecedented high-speed performance for real-time video distribution and data transmission in the home. Our Executive offering is based on a centralised controller managing all of your WiFi Access Points and switch powering and connecting your cameras or other network devices. Each WiFi access includes up to 30 meters of Cat5e network cabling, installation and setup. Each WiFi

Access Point can cover an estimated 150 square meters, depending on what your walls are made of. We can expand the coverage by installing additional Access Points in other parts of your home, all connected to network switch managed by the same centralised controller. A managed WiFi solution ensures that we can offer you worry-free connectivity for all your wireless devices, optimized connection speeds and better WiFi coverage throughout your home.

How It Works

Features and Benefits

Features	Benefits
Dual chain wireless (2.4GHz/5GHz) 802.11ac	With dual chain wireless (2x2) or MIMO you can connect more devices via WiFi and still enjoy fast WiFi speeds
8 and 16 Port Managed network switches	Network switches allow for cabled connections security cameras and other network devices. Managing switch from our controller allows for performance optimization remotely and quickly.
Powerful WiFi radios	We estimated a coverage area of 150 square meters per device but this could be more or less depending on what your homes walls are made of.
Centralised Performance Management	Our centralised controller allows our Support Team to Use the configurable reporting and analytics to manage usage, monitor and analyze the surrounding WiFi environment.
Mobile APP	Self manage your Home WiFi from your smartphone or tablet
Professional design and installation	Experienced engineers will install and setup everything you need in the best possible position to ensure great signal and performance. Additional devices can be purchased from your installer to increase coverage across your whole home

Additional Information

*Actual wireless data throughput, wireless coverage, and number of connected devices are not guaranteed and will vary as a result of:

- 1) environmental factors, including building materials, physical objects, and obstacles,
- 2) network conditions, including local interference, volume and density of traffic, product location, network complexity, and network overhead, and
- 3) client limitations, including rated performance, location, connection quality, and client condition.

**Range, coverage, and the maximum number of connected devices are based on test results under normal usage conditions.

**Improved WiFi
performance
for WFH**

About Vox

Innovation and insight combine in Vox, a market leading end-to-end integrated ICT and infrastructure provider and telecommunications company. From data to voice, as well as cloud, business collaboration and conferencing tools, Vox offers

intelligent solutions that connect South Africans to the world, supporting entrepreneurs, customers and commerce, whilst practicing values of integrity, choice and service excellence in all of its dealings. For more information **click here**.
