

Vox Wireless ISM

Quick-deployable solution over carrier grade ISM technology

Vox Wireless ISM

- Carrier grade ISM technology
- Symmetrical service
- Low latency, low jitter
- Scalability and flexibility
- Quick deployment
- Cost effective

Product overview

Vox Wireless ISM is a high-speed microwave service that can be deployed nationally and in areas where Fibre connectivity is limited. ISM radio bands are predominantly reserved for industrial, scientific and medical purposes. This service does not carry

the additional licensing fees applicable to Licensed Spectrum microwave services, which brings the overall cost of service down, and increases the overall value proposition for customers not requiring non-mission critical services.
