

Vox Visitor Management Solution for Business

VMS Corporate

Vox's Visitor Management Solution allows you to manage access and security to your business premises.

- Online electronic visitor register - Do away with manual visitor log books.
- System driven visitor access control - Always know who is on your premises.
- Layered security - Overlay with other security components.
- Improved customer interaction - Send welcome message to visitors and arrival and departure notifications to hosts.
- Online reporting portal available for occupancy stats.

Product overview

The Vox Visitor Management Solution is a cloud hosted platform that manages and controls visitor and contractor access. The solution comes with a Standard or Advanced option, with the main differences listed below:

Standard	Advanced
<p>Electronic visitor register</p> <ul style="list-style-type: none"> • No pre-booking allowed. The visitor arrives at the gate, has his/her identification and license disk scanned and gains access to the premises. • This option merely replaces the manual visitor access book at the gate, with an electronic register. • Access to online reporting portal. 	<p>Enterprise business visitor management application</p> <ul style="list-style-type: none"> • Employee invites visitors to the business through the online portal, a Vox branded smart app or Outlook Calendar integration. • Visitor receives a mail with a PIN or QR Code. • Upon arrival, the visitor identifies him/herself and the security guard captures the following: <ul style="list-style-type: none"> - Scans drivers and vehicle license - Keys in visitor supplied PIN or scans the QR code. • Notification of visitor arrival and departure is sent to the host through push notification and/or email. • Access to online reporting portal.

Manage access points, reporting access, users and events from the online portal.

Features and benefits

- **Process Driven**
Visitors cannot bypass security protocols, thereby creating a safer environment.
- **All Encompassing**
The guard app, mobile handheld computers with built-in RFID and barcode scanners, passport and ID OCR scanner-hardware, connected gate controller hardware, keypads, and more allows for turnkey access control and/or modular VMS solutions to be assembled based on client need and existing infrastructure.
- **Regulatory Compliance**
Privacy laws forces us to share personal data responsibly. Capturing visitor data electronically, ensures we abide by these laws.
- **VoIP Capability**
Make voice calls directly from handheld scanners.
- **Admin Portal**
Manage access points, reporting access, users and events from the online portal.
- **BI Insights**
Access to data to analyse visitor behaviour, enhancing security, and health and safety.

Access to data to analyse visitor behaviour, enhancing security, and health and safety.
