# Vox Archiving

Hassle-free and affordable data archiving to the cloud

- No interference with hot data
- Transparent access to archived files on source
- Affordably priced per GB
- Save onsite storage costs and backup time
- No egress costs / No changes to users or app access
- No disruptions

## Product Overview

While file data growth is exploding, IT budgets are not. Vox Archiving provides an easy path to the cloud. Move your data to the right place at the right time, without a lock-in.

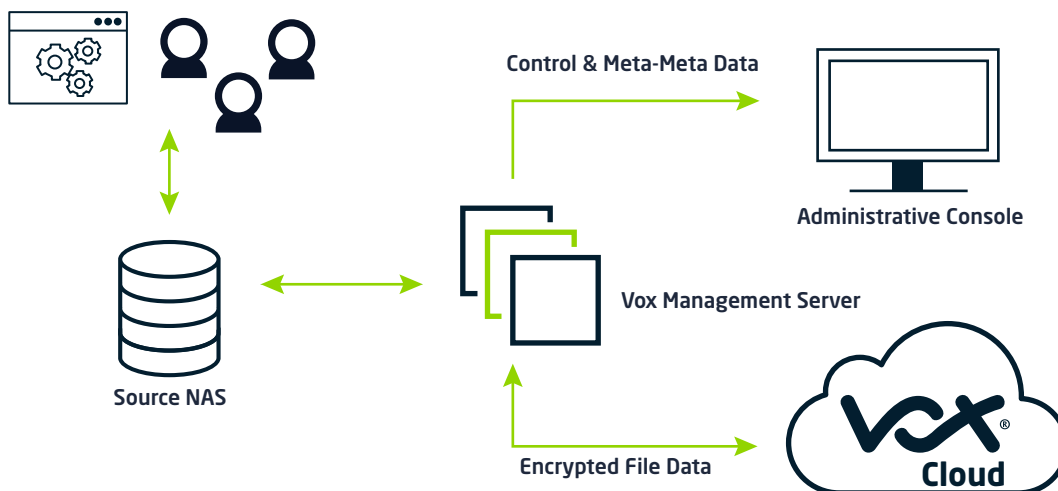

File data can be terabytes of data and millions of files. Cloud Archiving can save up to 70% of storage, backup and DR (data recovery) costs by offloading cold data to cost-efficient cloud storage.

Efficiently identifying and archiving cold data is the key to managing data growth, but only if it's done seamlessly. To better manage

explosive data growth, you need understand your data, know what's cold and start treating it differently. Vox Archiving gives you fast and meaningful insight on your whole data estate and moves cold data without users or applications noticing any access difference. Understanding your data and planning your archiving strategy will eliminate disruption and unintended costs.

Proprietary tiering solutions are limited, cumbersome to manage, and they lock in your data. We'll provide a way to analyse, mobilise and optimise the value of your unstructured data across hybrid and multi-cloud environments without the lock-in.

## How It Works

## Features and Benefits

### No Disruptions

- Users and applications access archiving files exactly as before.
- Retain the same access controls and security on your data.

### Onsite Storage Savings

Reduced onsite storage usage and backup costs.

### No Interference with Hot Data

- No performance degradation of hot data
- No invasive agents or stubs to disrupt users, apps or data protection

### No Egress Costs

Rehydrate your data fully at no additional cost to your company at any time.

### Data Mobility

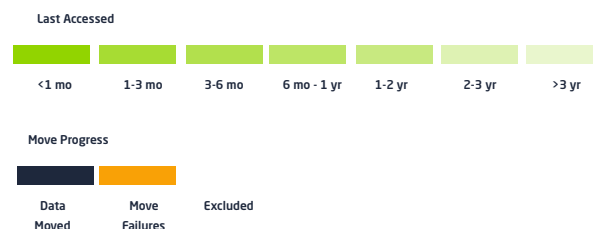

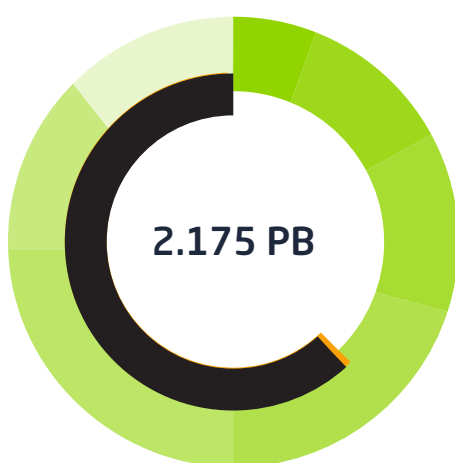

Migrate, archive, tier and move the right data to the right place at the right time.

### Deep and Dynamic Data Analytics

- Search across billions of files, with custom queries and tagging.
- Know your NAS or Object data usage and growth before buying more.
