

Keep Tabs on the Opening and Closing of any Door in Your Home

Vox Sixth Sense Door Sensor

Receive reports or alerts from any connected device via the Vox Sixth Sense app

- The sensors are easy to install
- Robust construction for use indoors as well as outdoors
- Connects automatically to an IoT-specific network
- Customisable report settings available
- Battery-powered, with battery status available on the Vox Sixth Sense app
- View the status of your doors via any connected device with the Vox Sixth Sense app

Product Overview

IoT (Internet of Things) provides us with the ability to add limited intelligence to the appliances and infrastructure we use every day. By adding Vox Sixth Sense sensors to your life, you'll be able to view the change in condition of your appliances or infrastructure via our Vox Sixth Sense application, saving valuable time and money in the process.

Not only does the Vox Sixth Sense Door Sensor take the doubt out of whether or not you've left an important door opened or closed, it also gives you the ability to view the status of that door remotely from any connected device.

With the Vox Sixth Sense app, you'll also have the option to only receive alerts for the change of status of the door during predefined time periods.

The sensors require very little DIY skills to install and connect automatically to an IoT-specific network, so you don't have to worry about adding extra burden to your home Wi-Fi network. The sensors are also battery-powered, meaning load shedding or power cuts won't affect them at all. The life-span of the batteries is determined by the number of activities your sensor is reporting on, and the battery status can be viewed via the Vox Sixth Sense application.

How it Works

Vox Sixth Sense Door Sensor

Features and Benefits

Easy to install on any door

No special skills or tools are needed to install the sensors and they fit on almost every door - including your garage door or pool gate.

Robust, flexible design

The installation isn't permanent, so you can move the sensors wherever you need them. The sensors can be used indoors or outdoors.

No additional network required

Our sensors connect automatically to an IoT-specific network - you're also free to set up your reporting parameters for how long a door can be left open or closed via the Vox Sixth Sense app.

Battery-powered

No need to worry about an unreliable, external power supply or additional cost to your electricity bill.

Enhance
your home
safety

About Vox

Innovation and insight combine in Vox - a market leading end-to-end integrated ICT and infrastructure provider and telecommunications company. From data to voice - as well as Cloud, business collaboration and conferencing tools - Vox offers

intelligent solutions that connect South Africans to the world, supporting entrepreneurs, customers and commerce, whilst practicing values of integrity, choice and service excellence in all of its dealings. For more information [click here](#).
