

Keep tabs on the location of your **most prized assets at all times.**

Vox Sixth Sense GPS Tracker

Attaches easily to any asset or person and sends accurate GPS positioning.

- The sensors are easy to install
- Robust construction for use indoors as well as outdoors
- Connects automatically to an IoT-specific network
- Set custom parameters and alerts via the Vox Sixth Sense app
- Battery-powered, with battery status available on the Vox Sixth Sense app
- Receive a daily "health status" ensuring device availability

Product Overview

IoT (Internet of Things) provides us with the ability to add limited intelligence to the appliances and infrastructure we use every day. By adding Vox Sixth Sense sensors to your life, you'll be able to view the change in condition of your appliances or infrastructure via our Vox Sixth Sense application, saving valuable time and money in the process.

The Sixth Sense GPS Tracker is a battery-operated tracking sensor that connects automatically to an IoT-specific network, providing you with an accurate GPS position of your most valuable assets. The GPS Tracker is small, robust and flexible, allowing you to attach it to anything that needs

tracking. There's no need to switch the sensor on or off as it's activated by movement.

The sensors require very little DIY skills to install and connect automatically to an IoT-specific network, so you don't have to worry about adding extra burden to your home Wi-Fi network. The sensors are also battery-powered, meaning load shedding or power cuts won't affect them at all. The life-span of the batteries is determined by the amount of activities your sensor is reporting on, and the battery status can be viewed via the Vox Sixth Sense application. The data captured can be viewed remotely from any connected device, including a laptop, PC or smartphone.

How it Works

Vox Sixth Sense GPS Tracker

Features and Benefits

Easy to install

No special skills or tools are needed to install the sensors.

Robust, flexible design

The sensor can be installed on any asset, indoors or outdoors, or carried by a person.

No additional network required

Our sensors connect automatically to an IoT-specific network.

Battery-powered

No need to worry about an unreliable, external power supply or additional cost to your electricity bill.

load shedding
or power cuts
won't affect
them at all

About Vox

Innovation and insight combine in Vox - a market leading end-to-end integrated ICT and infrastructure provider and telecommunications company. From data to voice - as well as Cloud, business collaboration and conferencing tools - Vox offers

intelligent solutions that connect South Africans to the world, supporting entrepreneurs, customers and commerce, whilst practicing values of integrity, choice and service excellence in all of its dealings. For more information [click here](#).
