

Vox Laptop Rentals

Say "Bye" to "Buy"

Why buy depreciating assets when you can rent them?

- Enhanced warranty
- Onsite maintenance
- Access to skilled staff
- Avoid technology obsolescence
- Best of breed
- Improved cash flow

Product overview

The era of **Work from Home** has revolutionised the way we use our laptops. Collaboration and video solutions are only as effective as the hardware and connectivity that powers it.

The **rapid rate of technological change** means that the average laptop needs to be replaced at least every three years, or immediately if your strategy is for staff to remain at home.

This is a burden on companies looking to **manage cash flow**, as the replacement costs for a small business could be hundreds of thousands of Rands.

Choosing to rent and not buy laptops allows for full, uninterrupted use of the equipment, after which it's simply replaced or upgraded when the agreement comes to an end. Vox offers two rental options:

New Laptops

Suitable for companies that demand the latest in technology because of performance requirements.

Benefits include:

- Flexible contract periods that are now available are month-to-month contracts as well as 24 and 36 months
- First-line hardware support from Vox certified engineers
- Onsite hardware replacement service
- Latest technology
- Optional onsite replacement devices for emergencies
- End of contract tech refresh or price reduction

Refurbished Laptops

Suitable for cost-conscious customers who don't require the latest technology.

Benefits include:

- Flexible contract periods (including short-term projects)
- Next business day replacement if the hardware fails
- Optional onsite replacement devices for emergencies.

Features & Benefits

- **Next business day onsite support**
Minimise employee downtime with our next business day onsite repair and/or replacement service.
- **Single point of contact**
One support number, no matter what brand you rent.
- **Best of breed**
Vox only partners with best of breed suppliers with local stock holding.
- **Avoid technology obsolescence**
Technology refreshment ensures your infrastructure is always ready to support your business goals.
- **Improve cash flow**
Ensure free cash is spent on business growth and not IT hardware.
