

Free fax-to-email

The most effective, secure way to receive critical documents straight to your inbox

Fax to Email

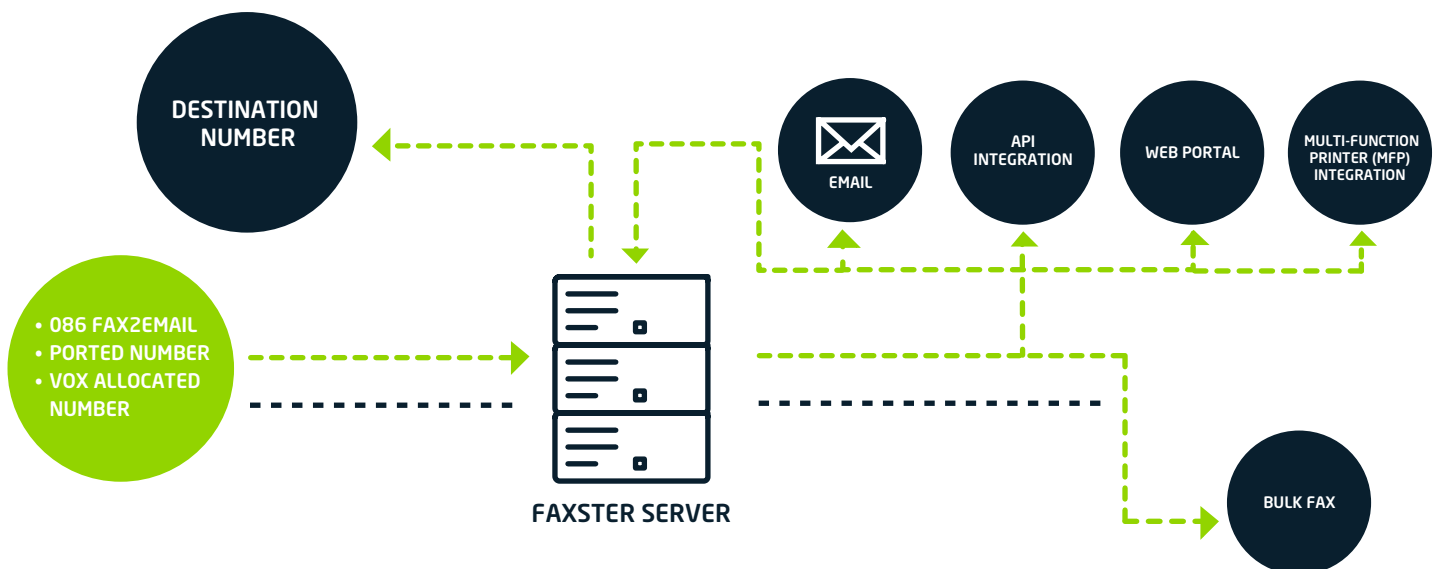

- Inbound faxes straight to your inbox, for free
- Green - use less paper and fax consumables
- Scalable - caters for peaks and troughs in fax volumes
- Search and retrieve fax content - fax content is read via OCR and a text version is stored with the fax image, allowing the content to be searched by any search engine
- Secure - full audit trail; industry standard encryption
- Cloud-based market-leading fax server technology

Product overview

Fax still remains the most effective option for delivering critical documents such as purchase orders, invoices, statements and application forms. Fax is a secure point-to-point solution that is universal, traceable (audit trail) and cost effective.

Faxster Lite, from Vox, is a free fax-to-email service that enables any individual or company with an email address to receive faxes directly into their inbox - free!

How it works

- You are allocated a unique Faxster Lite 086 number supplied by Telkom.
- The Faxster Lite service automatically links this number to your email address, and any fax sent to your fax number is delivered to your email as an attachment.

- Faxes are stored for 30 days, and your fax inbox can be accessed through a web browser.

Features and benefits

Search and retrieve fax content

- As a static image, one of the main benefits of fax documents is that they are legally binding because they are tamper-proof and fully secure. This normally means that faxes are nearly impossible to search, however, with Faxster's cutting-edge Optical Character Recognition (OCR) technology, all faxes become completely searchable, via any search engine. The content in each fax is referenced and can be searched for and found as easily as content in emails and text documents.

Free

- Inbound faxes are free of charge and there are no setup or monthly fees.

Safe and secure

- Faxes remain confidential as they are delivered directly to

the email address. Private faxes are made available only to those people who have the rights to view them.

Improves productivity

- Faxster Lite ensures there is no more time wasted looking for lost faxes or documents at a central fax machine.

Additional Benefits

- Every individual with an email address can have a fax number.
- No staff needed to manage the solution.
- No software or hardware required.
- Fax numbers can be kept for life, even if individuals or companies move.
- Telkom fax lines can be freed up or used as voice lines.

Upgrade now

Upgrade from Faxster Lite to Faxster at any time if you require any of the following features:

- Outbound email-to-fax.
- Alternative number ranges:
 - Geographic numbers (021, 011, etc.).
 - Number porting - retain your existing fax number with all the features of Faxster.
- Intelligent fax routing – publish one fax number, and have faxes intelligently routed to the desired business person or application based on the content, such as a person's name, an account number or department.

- Custom cover sheets for outbound faxes – populate human or system generated unique identifiers for the cover sheet so that the return fax can be intelligently routed to the initiator.
- BulkFax - send large fax volumes automatically with variable data merged into a standard fax.
- Fax integration with ERP, CRM and ECM back-office applications such as Oracle, SAP, ERP and CRM.
- Fax archiving – store and access archived faxes of all inbound and outbound fax transactions beyond the standard 30-day fax storage period.
