- ⊘ Extensive device portfolio for any meeting space
- ⊘ Consistent experience across devices
- ⊘ Microsoft Teams Certified brands
- ⊘ Low cost-of-ownership
- ⊘ Direct Guest join for Zoom and Webex

Product Overview

A Microsoft Teams meeting in a room setting is very different experience to that of a Teams meeting on a desktop or laptop. Desktop and laptop enabled meetings cater only for one participant, whereas in a room setting all people in the meeting space need to be seen and heard by other participants. Participants on the far-side of the call also need to be seen and heard by all people in the meeting space. This requires that each meeting space is equipped with appropriate cameras, microphones, audio playback devices and a display to suit the needs of the space.
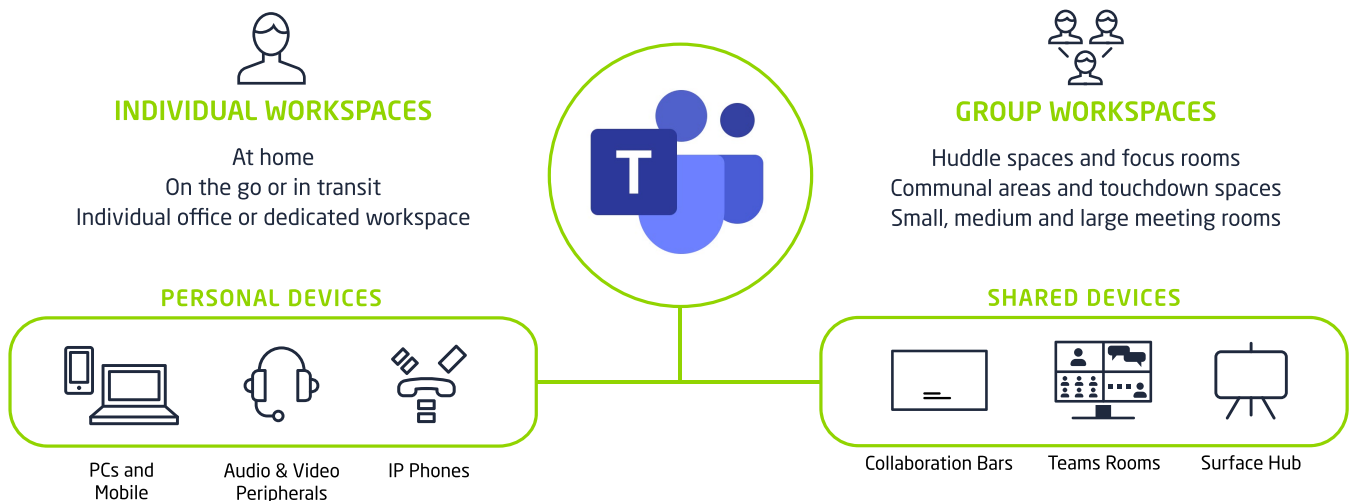

For every workspace and workstyle, there's a Microsoft Teams device to choose from. Microsoft works with an ecosystem of best-in-class device partners to deliver a native, purpose-built Teams experience, no matter the setting. Although making the transition from personal devices to meeting space systems may seem daunting, Vox has assessed all Microsoft Teams

Room (MTR) systems available so that you do not need to agonise over which MTR will deliver on your needs.

Vox has selected MTR systems that when deployed will deliver a consistent teamwork experience from desktop to boardroom. Using a mix of AI, machine learning and the power of Microsoft Graphic, our selected solutions will ensure that your meeting spaces are equipped with fit-for-use systems that will require minimal training and support, while your people effortlessly start or join meetings with intuitive touch controls.

Our selected MTR devices offer familiar and consistent experiences across all device types. Certified to deliver high-quality audio, video, and sharing experiences, said devices enhance calling and meeting experiences, allowing everyone to be heard clearly wherever they may be.

How It Works

INDIVIDUAL WORKSPACES

At home
On the go or in transit
Individual office or dedicated workspace

GROUP WORKSPACES

Huddle spaces and focus rooms
Communal areas and touchdown spaces
Small, medium and large meeting rooms

PERSONAL DEVICES

PCs and Mobile

Audio & Video Peripherals

IP Phones

SHARED DEVICES

Collaboration Bars

Teams Rooms

Surface Hub

Features and Benefits

- **One-touch Join**
  Join a meeting quickly and easily with a single touch.

- **Proximity Beacon**
  Easily discover and add available nearby Microsoft Teams Rooms to any Teams meeting from your personal device using the Microsoft Teams App.

- **Auto-framing**
  Intelligent camera technology frames the meeting room participants, providing the most appropriate meeting room view.

- **Content Capture**
  Transforms the traditional whiteboard into a digital canvas within your Teams call. Add a content camera to intelligently identify, clean and crop whiteboard content for display to farside participants.

- **Quality Assurance**
  High quality audio, video and sharing experiences on any device, in any space.

Using a mix of AI, machine learning and the power of Microsoft Graph, our **intelligent communications** solutions will introduce new features and experiences **before, during and after** any meeting or call.

Additional Information

Microsoft Teams Room and Voice licensing may be included to provide a single solution for all your UC requirements. There is no longer the need to have separate video and voice conferencing system in your meeting rooms. With the addition of Vox's TeamsVoice, you can call any telephone number directly from your MTR system - either as a standalone call or to bring the voice participant into a Teams meeting.

MICROSOFT TEAMS DIRECT ROUTING

Teams user — Microsoft Teams with TeamsVoice — Internet — SBC — PBX — PBX User/Phone — Carrier/Telco — External caller

- **Certified devices**
  Purpose-built calling and meeting systems deliver a native Microsoft Teams experience with HD audio and video, on Teams certified 3rd party hardware.

- **Live captions**
  Ensure inclusion for all participants with a real-time text stream display on the screen as participants speak during a meeting.

- **Calendar integration**
  Microsoft 365-based services use Azure Active Directory authentication to natively integrate and sync your meeting rooms calendars with your booking details, enabling one touch to join.

- **Voice Assistant**
  Use natural language to engage Cortana and start or end a meeting with a verbal command.

From desktop to boardroom.

Coming Soon

- **Meeting room capacity notifications**
  Help keep meeting spaces safe. Get an alert from Microsoft Teams Rooms when a room is at capacity.

- **Room remote**
  Control your Teams Room devices using the room remote experience in the Microsoft Teams mobile app.

Driving the future of hybrid work with a solution for any space and every work style.
