Product Overview

Business Fibre

Business Fibre is built for small to medium sized businesses that require unshaped, high-speed, reliable internet connectivity. It offers a fully managed service with a WiFi enabled router and uncapped data that routes on a static IP. Business Fibre is not only designed to fit your budget, but your quality needs as well, giving you access to connectivity solutions containing the services you require to effectively digitise your business.

Features & Benefits

Feature:	Benefit:
Business Priority, Uncapped, Unshaped Connectivity	Receive uncapped, reliable and fast Internet access at all times. No shaping is applied which means all traffic gets equal priority.
Secure Online Management Portal	Have full control of your Business Fibre account via the Customer Zone to monitor usage, manage data accounts and receive usage notifications.
Fair Use Policy	A Fair Use Policy applies on the fibre uncapped services to ensure fair use across all customers on the network. Speak to your sales consultant for more info and how this can be waived.
Static IP Addresses	An additional /30 IP range can be purchased, providing you with a usable static public IP address that can be used for hosting, remote access and VoIP services.
Works When You Work	Business Fibre is optimised for usage during peak business hours, and to minimise waste during downtime. Ensures that businesses don't compete with consumer downloads.
Fully-Managed WiFi-Enabled Router	Vox provisions, configures, monitors and manages your router to enable your business to focus on what matters.
Wide Coverage Available	We have partnered with a variety of Fibre Network Operators, including Frogfoot, Vumatel, Openserve, Link Africa and Octotel. This means Business Fibre can be delivered almost anywhere in South Africa.
