

An excellent high speed alternative to ADSL or Fibre

- An attractive option for broadband users
- Fast connectivity for areas with no access to ADSL or Fibre
- An affordable option without any fixed line installation
- Next generation network technology offering improved quality and high speeds
- Easy to install

Product Overview

With high speed, top-quality Internet access, Vox LTE offers the best connectivity even for the most demanding users and applications.

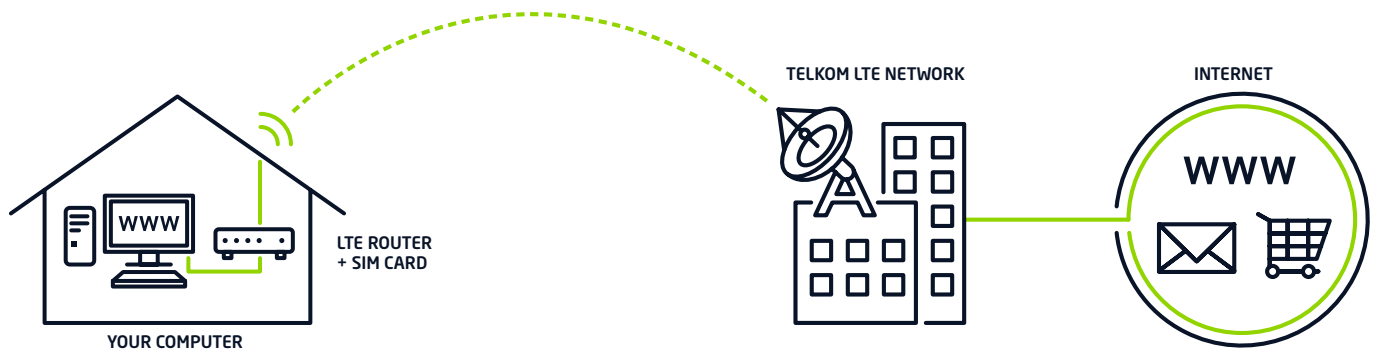

Fibre networks might take weeks or months to roll out and install, Vox LTE is a rapid order-to-installation product.

If you live in an area with high-density Vox LTE coverage, you can expect this high-quality Internet access delivered to you within 7 to 10 days.

As national network coverage grows, Vox LTE becomes an increasingly attractive alternative to traditional broadband connectivity.

Vox LTE offers Fibre-like speeds that are significantly faster than what's available on copper networks.

How It Works

Main Features and Benefits

- Month-to-month contracts available to suit your budget
- Capped data account; no bill-shock
- SIM can be moved around if used within coverage areas
- Plug and play for quick Internet access
