

The ultimate backup plan for uninterrupted Internet access

Fixed LTE-A Failover

You'll still enjoy Fibre-like speeds if your primary line goes down

- Connects automatically for uninterrupted Internet access
- MTN Fixed LTE-A offers extensive coverage
- No bill shock thanks to a once-off Top Up or monthly recurring Data bundle
- 2GB of monthly inclusive data to monitor the status of your Fibre line

Product Overview

Vox Fixed LTE-A Failover automatically switches you over to the Fixed LTE-A network as a backup connectivity medium in the event of a Fibre outage or when your Fibre / Wireless is temporarily unavailable.

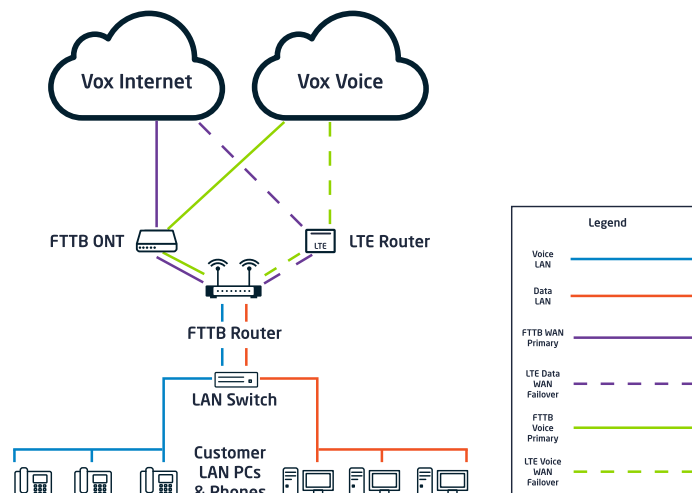

When paired with a UPS, this solution offers total peace of mind, knowing that you're still able to access the Internet at Fibre-like speeds to ensure seamless business continuity, not to mention stay in the loop during that all-important Teams meeting, if your primary line goes down.

Vox Fixed LTE-A Failover offers competitively priced Data bundles, with the option to add Top Ups as a once-off purchase when your Fibre / Wireless line is down or opt for a monthly recurring Data bundle. This includes the flexibility of month-to-month contracts with no long-term commitment and 2GB of monthly inclusive Data that monitors the status of your Fibre / Wireless line.

Consider this as your ultimate backup plan for uninterrupted access to the Internet to ensure you always stay connected.

How It Works

FTTB MTN F-LTE Failover

Main Features and Benefits

- **No Bill Shock**

Purchase a once-off Top Up Data bundle when your primary link goes down to effectively manage your budget or opt for a monthly subscription package.

- **Complete Control**

If you need more Data, you can Top Up or upgrade your package with ease via the Vox Customer Zone.

- **2GB Of Monthly Inclusive Data**

Stay connected while you monitor the uptime of your Fibre line.

- **Extensive Coverage**

MTN's Fixed LTE-A network extends across most of the country, meaning we're sure to have you covered.

- **Total Business Continuity**

Vox FTTB, VoIP and PBX customers will still be able to make and receive calls via the Fixed LTE-A network.

Vox Fixed LTE-A Failover is dependent on your Fibre line / Wireless link being installed first. Once this is done, one of our on-site engineers will be able to set up your Fixed LTE-A Failover service. T&Cs apply.
