

5G Uncapped Bundles

Vox Fixed 5G: The Fastest Fixed Wireless Internet Access Solution for Home and Business

- Faster and smoother download and upload speeds
- Lower latency means better Live Streaming and Improved Gaming
- It's Uncapped and hassle free
- Fast enough for the whole family to connect
- Good alternative connectivity for Business Customers
- Available month-to-month so no contracts

PRODUCT OVERVIEW

This product gives access to affordable, reliable, uncapped Internet, especially to customers who prefer not to order fibre (customers who rent etc).

Having a fixed cost helps individuals and businesses to better budget for their connectivity by knowing exactly how much they will spend each month, and this is not something that can be easily determined when you are at the mercy of top-ups.

5G routers are expensive, but we are offering routers at discounted prices, and also including an affordable rental option, if preferred.

Targeted at higher income consumers and business customers.

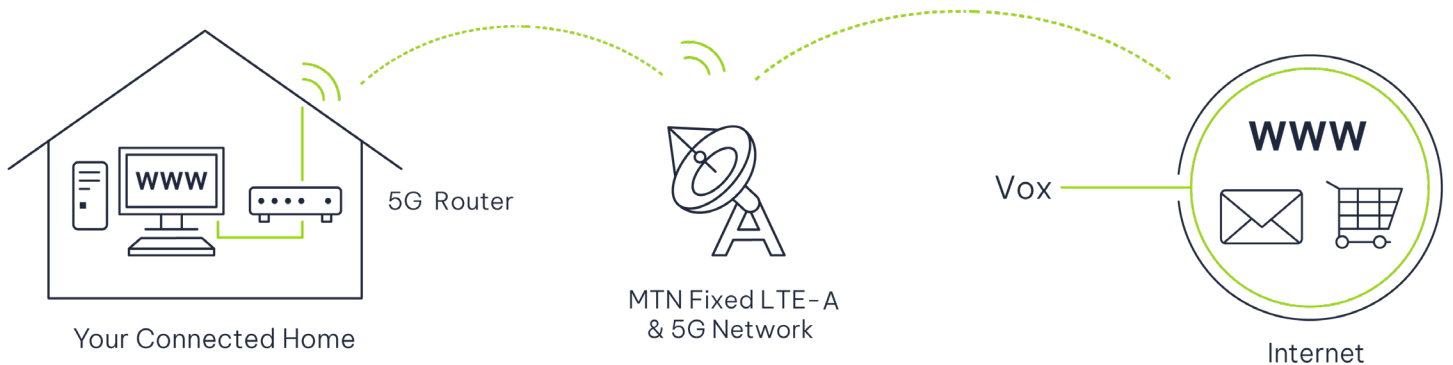

Fibre-like speed at a very affordable price! Fast enough for the whole family to connect to.

Having an uncapped solution is hassle-free

Month-to-month so no long-term contracts.

Note: It is Fixed 5G but customers have the ability to add a secondary address whenever required, within a matter of minutes.

HOW IT WORKS

FEATURES AND BENEFITS

- **5G offers lower latency**

Enables better Live Streaming, Improved Gaming capabilities/experience and improved Video Calling
