

Advanced online and device safety for the whole family.

Cyber threats have evolved – but so have our defences.

- Real-time device protection against viruses, spyware, ransomware, malware and other online threats
- Secure VPN allows you access to your favourite apps and websites when connecting to Wi-Fi at home or on the go
- Smart Firewall monitors communication and blocks unauthorized traffic to your PC
- SafeCam provides instant alerts on attempts to access your webcam and assists in blocking unauthorised access
- Parental control enables your kids to explore the internet safely and protects them from inappropriate content
- Location tracking allows parents to define safe zones for their children and receive real-time alerts when those boundaries are crossed. Children can also share their location through the mobile app
- By setting clear usage limits, Time Supervision helps your child develop healthy device habits that last a lifetime
- Monitor search terms, videos, app downloads, receive alerts for unsafe behaviour and get detailed activity reports

PRODUCT OVERVIEW

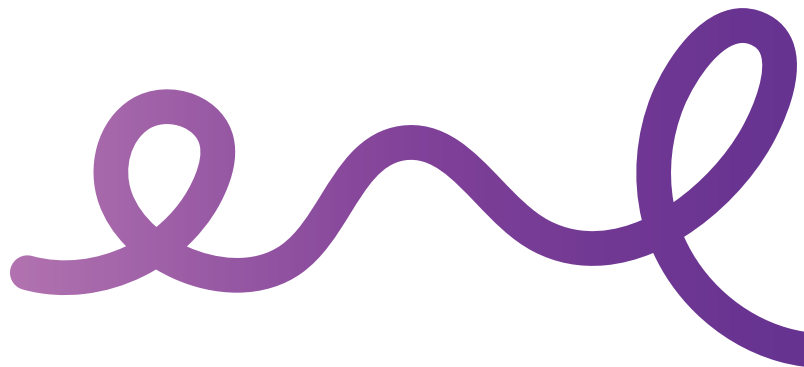

Norton 360 offers comprehensive protection for your devices and online privacy, all in one solution. It safeguards your PCs, Macs®, tablets, and smartphones from viruses, ransomware, phishing, and other cyber threats while you bank, shop, and browse online.

With Secure VPN, your personal information is protected both at home and on the go through bank-grade encryption, even on public Wi-Fi, helping to block cybercriminals from accessing your data.

Norton 360 also includes PC Cloud Backup to prevent data loss from hard drive failures, stolen devices, or ransomware attacks. The Password Manager provides secure tools to manage your logins, and Parental Control helps monitor and guide your children's online activity.

Norton Family empowers your kids to safely explore the online world. It encourages open conversations about safe and responsible internet habits, while its features help manage screen time and provide tools to ensure your kids enjoy the web without oversharing or encountering harmful content.

FEATURES AND BENEFITS

Device security

Robust, all-in-one protection against viruses, malware, ransomware, and online treats

Secure VPN

Safe browsing of you favorite apps and websites on and Wi-Fi connection, at home or on the go

Password Manager

Generate, store and manage your passwords, credit card details and other sensitive information more securely

Smart Firewall

Actively monitors communication between your computer and other devices, blocking unauthorised access

SafeCam

Safeguard your webcam by providing instant alerts for any unauthorised access attempts and helps block them

Web Supervision

Let your kids explore the Web freely, with tools that block unsuitable websites while keeping you in the know about which sites they're visiting.

Time Supervision

Stay on top of how much time your kids spend on their devices. Foster healthier habits by scheduling specific times of the day or week each device can be used, and how many hours a day can be spent on each device (daily time limit functionality is not supported on iOS, but time curfew functionality is supported).

Search Supervision

See the words, terms, and phrases your kids are searching for to gain insights into their interests and help protect them from inappropriate content.

Personal Information Protection

Help your children avoid giving out sensitive personal information when online, including phone number, address, school they attend, or email address.

Email Alerts

Find out when your kids attempt to visit a blocked site so that you can start a conversation about appropriate content.

Access Request

Open the lines of communication by enabling your kids to send you a note from within Norton Family if they disagree with a blocked site or a house rule.

Parent Portal

Helps you manage protection for all your devices with an easy-to-use web portal.

Activity History

See at a glance what your kids are doing on their connected devices and how much time they've spent on their PCs, so you can clearly spot trends and emerging habits.

Parent Mobile App³ **

Stay in the loop about your kids' online activities from your Android or iOS mobile device and adjust settings when you're on the go.

Location Supervision^{2,3} **

Stay informed about where your kids are with tools that enable you to map the location of their Android or iOS devices and provide a 30-day history to show where they've been.

Mobile App Supervision³ **

See which apps your kids have downloaded on their Android devices and choose which ones they can use.

Video Supervision⁴

See a list of the YouTube videos your kids watch on their devices and even view a snippet of each video, so you know when you need to talk.

Instant Lock

Parents can help kids take a break by locking the device, so they can re-focus, or join the family at dinner. Once in lock mode, all of the device's applications, web browsers, games, Microsoft products and more are inaccessible, until manually disabled via the Family Portal. Individual devices can be unlocked with a PIN. Parents and children can still contact each other while the device is in lock mode.

Monthly/Weekly Reports

Opt to receive detailed reports of what your kids are doing online, right in your inbox via the Parent Portal.
