

Cloud BackUp.

Protect your business from Ransomware and accidental deletion with Cloud Backup powered by Veeam

- Comprehensive protection across servers and workstations
- Secure off-site backup, hosted in South African ISO-certified facilities
- Multi-layered security with end-to-end encryption and insider protection
- Veeam's industry-leading technology ensures your data is safe, secure and recoverable, minimising downtime and business disruption
- Hosted by a Veeam Platinum Service Provider with a focus on compliance and data sovereignty
- Data freedom: Recover exactly what you need, anywhere, with zero lock-in

PRODUCT OVERVIEW

Vox Backup and Data Protection provides intelligent data management for workstation and server workloads. Vox delivers secure backup and recovery for servers and workstations in partnership with Nymbis – a Veeam Platinum Service Provider, with multi-layered security, end-to-end encryption and off-site retention.

The solution enables organisations to execute hybrid backup strategies with on-site copies for fast restores, and off-site copies for safekeeping, meeting stringent recovery objectives. The platform supports compliance, data sovereignty and multi-cloud operations.

FEATURES AND BENEFITS

- **Backup for Servers**
Protect Windows and Linux servers; back up data, files, applications and databases
- **Backup for Workstations**
Image-level or Folder-level backups run automatically to keep critical end-user data secure
- **Hybrid Off-site Retention**
Send jobs off-site in a few clicks; store for long-term retention
- **Data Security**
Multi-layered security gives the confidence that your data is always protected
- **Data Recovery**
Recover exactly what you need, where and when you need it
- **Data Freedom**
Protect all your data, anywhere, any way, with zero lock-in
