THE CHALLENGE

Email Is The #1 Attack Vector

Business Email Compromise, phishing and malware cost organisations billions every year and traditional spam filters simply can't keep up with AI-generated attacks.

THE SOLUTION

Sophos Email solves this with **over 20 AI and deep machine-learning models** that work 24/7 to intercept threats before they reach your inbox and automatically take care of any that may slip through.

Experience comprehensive email security in a single, streamlined solution.

Enjoy guided onboarding, fine tuning and ongoing 24/7 support from the Vox Team.

WHY SOPHOS EMAIL

Six Reasons It's The Best Choice

>> Stop Threats Before Delivery

01

20+ AI models block phishing, BEC & malware before they reach your inbox.

>> Undo Mistakes After Delivery

02

Post-delivery search automatically retrieves and deletes malicious emails.

>> Seamless Integration

03

Layer on top of existing platforms like M365 and Google Workspace with zero disruption.

>> Create A Human Firewall

04

Built-in phishing simulations and awareness training help reduce employee error.

>> Keep Sensitive Data Safe

05

Automatic Data Loss Prevention stops confidential information leaking out via email.

>> Singular Management

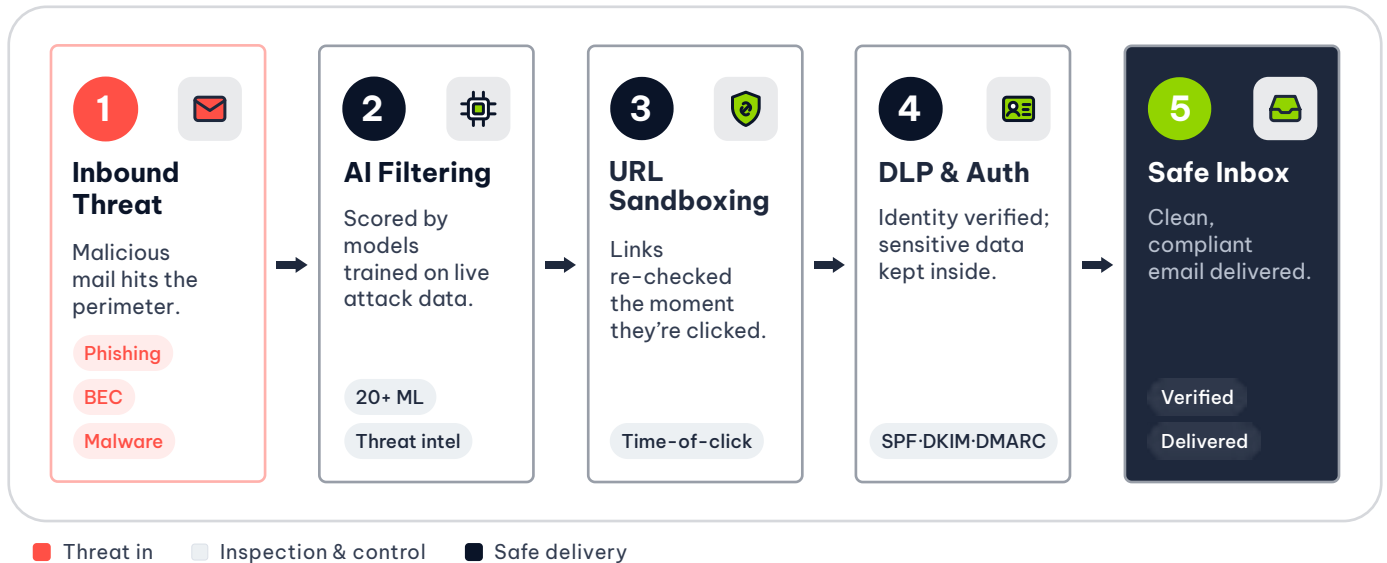

06

Manage email, Endpoint and Network security from one unified dashboard with Sophos Central.

HOW IT WORKS

Five Layers - One Clean Inbox

Every email passes through a multi-layered security flow, stopping threats before they reach your team.

KEY FEATURES

Everything In One Console

FEATURE	WHAT IT DOES FOR YOU
01 Global Threat Intelligence	The neural network analyses email DNA to block zero-day & Algenerated attacks in real time.
02 Post-Delivery Remediation	Automatically retrieves and deletes malicious emails from user inboxes, even after delivery.
03 Identity and Domain Authentication	Verifies sender fingerprints to prevent domain spoofing and impersonation attacks.
04 Time-Of-Click URL Sandboxing	Checks links at the moment they're clicked, in a secure cloud environment.
05 DLP (Data Loss Prevention)	Scans outbound email and prevents sensitive data from leaving the organisation.
06 Security Awareness Training	Integrated phishing simulations and interactive training to educate employees.
07 Emergency Standby Inbox	Keeps email flowing if your primary provider has an outage – business continuity guaranteed.
08 Unified Management Console	Manage email, Endpoint and Network security from one centralised dashboard.

REAL-WORLD USE CASES

Built For How You Actually Work

USE CASE 01 Financial Services

A finance team is targeted by BEC attacks. Sophos Email verifies every sender's identity and blocks impersonation, protecting payments and client data in the process.

USE CASE 02 Healthcare

Time-Of-Click URL Sandboxing checks every link at the moment it's clicked, and DLP prevents sensitive patient data from being emailed externally.

USE CASE 03 Law & Professional Services

Phishing emails impersonating senior partners are blocked. If one slips through, post-delivery remediation claws it back automatically.

USE CASE 04 Multi-Site Retail & SME

Sophos' unified console provides a single view across all users, with automated threat response that works 24/7.

PRICING & PACKAGES

Flexible pricing that scales with you
