DLP & DMARC

Post-Delivery Remediation

M365 & Google Workspace Compatible

THE CHALLENGE

## Email Is The #1 Attack Vector

Business Email Compromise, phishing and malware cost organisations billions every year and traditional spam filters simply can't keep up with AI-generated attacks.

THE SOLUTION

Sophos Email solves this with **over 20 AI and deep machine-learning models** that work 24/7 to intercept threats before they reach your inbox and automatically take care of any that may slip through.

*Experience comprehensive email security in a single, streamlined solution.*

Anti-phishing, anti-malware, BEC and impersonation defence, from the start.

**Continuous Monitoring**  
The Sophos X-Ops threat intelligence database updates every inbox in real time.

**Vox-Managed Rollout**  
Enjoy guided onboarding, fine tuning and ongoing 24/7 support from the Vox Team.

## WHY SOPHOS EMAIL

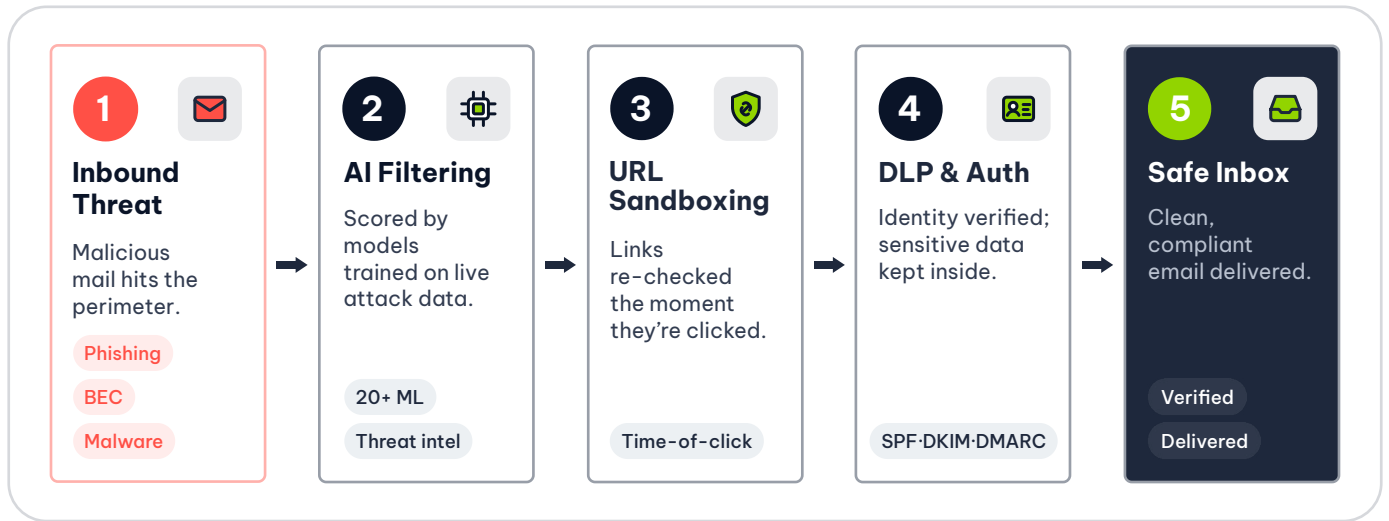

### Six Reasons It's The Best Choice

<b>&gt;&gt; Stop Threats Before Delivery</b> <b>01</b> 20+ AI models block phishing, BEC & malware before they reach your inbox.	<b>&gt;&gt; Undo Mistakes After Delivery</b> <b>02</b> Post-delivery search automatically retrieves and deletes malicious emails.
<b>&gt;&gt; Seamless Integration</b> <b>03</b> Layer on top of existing platforms like M365 and Google Workspace with zero disruption.	<b>&gt;&gt; Create A Human Firewall</b> <b>04</b> Built-in phishing simulations and awareness training help reduce employee error.
<b>&gt;&gt; Keep Sensitive Data Safe</b> <b>05</b> Automatic Data Loss Prevention stops confidential information leaking out via email.	<b>&gt;&gt; Singular Management</b> <b>06</b> Manage email, Endpoint and Network security from one unified dashboard with Sophos Central.

## HOW IT WORKS

### Five Layers - One Clean Inbox

Every email passes through a multi-layered security flow, stopping threats before they reach your team.

■ Threat in   ■ Inspection & control   ■ Safe delivery

## KEY FEATURES

### Everything In One Console

FEATURE	WHAT IT DOES FOR YOU
<b>01 Global Threat Intelligence</b>	The neural network analyses email DNA to block zero-day & Algenerated attacks in real time.
<b>02 Post-Delivery Remediation</b>	Automatically retrieves and deletes malicious emails from user inboxes, even after delivery.
<b>03 Identity and Domain Authentication</b>	Verifies sender fingerprints to prevent domain spoofing and impersonation attacks.
<b>04 Time-Of-Click URL Sandboxing</b>	Checks links at the moment they're clicked, in a secure cloud environment.
<b>05 DLP (Data Loss Prevention)</b>	Scans outbound email and prevents sensitive data from leaving the organisation.
<b>06 Security Awareness Training</b>	Integrated phishing simulations and interactive training to educate employees.
<b>07 Emergency Standby Inbox</b>	Keeps email flowing if your primary provider has an outage – business continuity guaranteed.
<b>08 Unified Management Console</b>	Manage email, Endpoint and Network security from one centralised dashboard.

## REAL-WORLD USE CASES

### Built For How You Actually Work

#### USE CASE 01 Financial Services

A finance team is targeted by BEC attacks. Sophos Email verifies every sender's identity and blocks impersonation, protecting payments and client data in the process.

#### USE CASE 02 Healthcare

Time-Of-Click URL Sandboxing checks every link at the moment it's clicked, and DLP prevents sensitive patient data from being emailed externally.

#### USE CASE 03 Law & Professional Services

Phishing emails impersonating senior partners are blocked. If one slips through, post-delivery remediation claws it back automatically.

#### USE CASE 04 Multi-Site Retail & SME

Sophos' unified console provides a single view across all users, with automated threat response that works 24/7.

**PRICING & PACKAGES**
