

Sophos XDR (Extended Detection and Response)

Stop threats before they start with a highly-sophisticated AI-powered endpoint security solution

- Accelerate security operations with GenAI
- Effortless management
- Extended visibility beyond the Endpoint
- Ransomware protection
- Automatic threat response
- Built on the strongest protection

PRODUCT OVERVIEW

Sophos XDR delivers comprehensive threat detection and response capabilities, covering all critical attack surfaces.

It incorporates Sophos's industry-leading endpoint protection and Extended Detection and Response (EDR) features. XDR unifies information from multiple security products to automate and accelerate threat detection, investigation and response in ways that isolated point solutions cannot.

By integrating data from various Sophos solutions and third-party tools, it uses advanced threat analytics to identify and highlight suspicious activities.

The system provides intuitive tools and streamlined workflows through a dedicated Threat Analysis Centre within Sophos Central, making it easier for IT teams to investigate and respond to potential threats effectively.

“Empowering your security team with AI driven insights”

FEATURES AND BENEFITS

- **Deep learning AI**
Detects and blocks new and unknown malware without signatures
- **CryptoGuard Anti-Ransomware**
Automatically stops ransomware and rolls back files to their safe state, so you never have to pay a ransom
- **Extended Detection and Response (XDR)**
Correlates data from multiple sources (endpoints, firewalls, etc) to give a full picture of an attack
- **Synchronised Security**
Security products automatically share threat intelligence and respond to incidents together
- **Exploit Prevention**
Blocks the core techniques attackers use to distribute malware and evade detection
- **Automated Incident Response**
Speeds up response times, allowing for rapid containment of threats and minimising damage

ADDITIONAL INFORMATION

Accelerate security operations with GenAI: Generative AI in Sophos XDR enables fast, confident decisions. The AI Assistant guides all users through threat investigations to stop attackers quickly.

Extended Visibility beyond the Endpoint: Go beyond the endpoint. Intercept X with XDR synchronises data from endpoints, servers, firewalls and other security products to provide a comprehensive, holistic view of your entire organisation's environment.

Effortless Management: Managed from a single cloud-based platform, Sophos Central, it is easy to deploy and manage, requiring minimal IT expertise to maintain a strong security posture.

Built on the strongest protection: Sophos XDR combines top endpoint protection with advanced detection to block threats early, reducing incidents and easing IT workloads.

“Comprehensive visibility,
seamless integration and
24/7 protection”
