

VOX GAMING SUITE

UPGRADE YOUR VOX FTTH EXPERIENCE FOR LAG-FREE GAMING

QoS Traffic Isolation + Streaming Relay Server

Enjoy smooth, uninterrupted play time with the Vox Gaming Suite. Keep your regular browsing intact while segmenting a portion of your line-speed to ensure reduced lag and minimal disruption.

 Gaming QoS	 Play & Stream
PAID ADD ON	FREE WITH VOX FIBRE
• Dedicated gaming traffic lane • Eliminates latency spikes • Reduces jitter & ping time • OTA config – no technician • Month-to-month, no lock-in	• Up to 1080p uninterrupted streams • Twitch, YouTube, TikTok & more • RTMP relay – low-latency path • PC & console (via capture card) • 7 major platforms supported

GAMING QOS

SOLVING THE PROBLEM

CHALLENGE

Someone starts Netflix and your ping spikes. Game stutters mid-match – even on a fast line.

SOLUTION

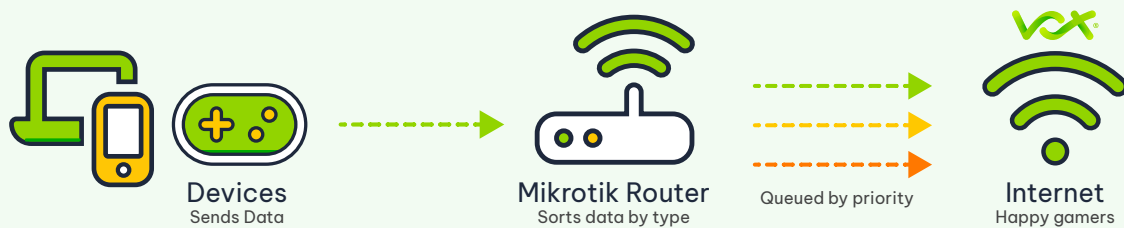

Gaming QoS reserves a dedicated slice of your FTTH link – other traffic can't touch it.

SPEED ALLOCATION EXAMPLES

LINE SPEED	DOWNLOAD	UPLOAD	RESERVED
100/20Mbps	98Mbps	19Mbps	2Mbps
50/50Mbps	48Mbps	48Mbps	2Mbps
25/10Mbps	24Mbps	9Mbps	1Mbps
25/25Mbps	24Mbps	24Mbps	1Mbps

HOW IT WORKS

KEY BENEFITS

>> No Latency Spikes

Gaming lane isolates you from household traffic spikes.

>> Lower Jitter

Reduced variance keeps gameplay smooth and predictable.

>> OTA Setup

Configured remotely on your Mikrotik. Zero downtime.

STREAMING RELAY

Vox routes your stream through a dedicated carrier backbone relay, eliminating ISP infrastructure delays. The result: consistent 1080p streams to all major platforms – completely free with your Vox Home Fibre subscription.

HOW TO SET UP

1

Open you capture app

Go to Settings → select Custom Streaming Server.

2

Enter RTMP URL

Paste the URL for your platform from the list below.

3

Add your stream key

Get your stream key from Twitch, YouTube, etc.
